Professional Summary

CompTIA Security+ certified cybersecurity professional with hands-on experience building Security Operations Center (SOC) home labs using Wazuh SIEM, Sysmon, Wireshark, Nmap, Kali Linux, Ubuntu Linux, Windows 11, and VirtualBox. Experienced in endpoint monitoring, log analysis, threat detection, Windows event investigation, and security troubleshooting. Seeking an entry-level SOC Analyst, Cybersecurity Analyst, or IT Security role.

Certification

- CompTIA Security+ (SY0-701) – 2026

Technical Skills

SIEM (Wazuh)

Windows Security

Linux (Ubuntu, Kali)

Wireshark

Nmap

Sysmon

Windows Event Viewer

VirtualBox

TCP/IP, DNS, HTTPS/TLS, ICMP

Threat Detection

Incident Response

Log Analysis

Git & GitHub

Cybersecurity Projects

Wazuh SIEM Home Lab

Designed and deployed a Wazuh SIEM Home Lab using Ubuntu Linux and Windows 11 in VirtualBox.

Installed and configured Wazuh Manager, Indexer, Dashboard, and Windows Agent.

Connected a Windows endpoint for centralized log collection and security monitoring.

Monitored authentication events, endpoint telemetry, and security alerts through the Wazuh Dashboard.

Troubleshoot networking, agent enrollment, services, and endpoint communication.

Documented architecture, deployment steps, screenshots, and troubleshooting on GitHub.

Network Traffic Analysis Home Lab

Built a lab using Kali Linux and VirtualBox.

Performed host discovery with Nmap.

Captured and analyzed DNS, HTTPS/TLS, TCP and ICMP traffic using Wireshark.

Windows Security Monitoring with Sysmon

Configured a Windows 11 VM.

Investigated Event ID 4624 logons.

Installed Sysmon and analyzed process creation events.

Professional Experience

Security Patrol Officer | Hogan Guards | 2022-2023

Security Patrol Officer | Trakforks Security | 2019-2021

Education

Bachelor of Engineering (B.Eng.), Materials and Metallurgical Engineering
Federal University of Technology Owerri (FUTO), 2025

Professional Development

- Continuously building SOC detection labs using Wazuh, Sysmon, Windows 11, Ubuntu and Kali Linux.
- Developing detection engineering projects mapped to the MITRE ATT&CK; framework.
- Maintaining GitHub repositories with attack simulations, detections, incident reports and documentation.
